Weighing Scale Tampering Guard

The Anti-Tamper Guard is a universal security solution for commercial weighing scales that detects and prevents calibration tampering, providing instant alerts and real-time GPS tracking through a dedicated app.

Features and Capabilities

- **Universal Compatibility:** This tamper guard can be integrated with any commercial weighing scale or digital weight indicator.
- **Tamper Detection:** It can detect when the calibration housing is opened or when the calibration function is enabled, a common sign of tampering.
- **Instant Alerts:** You can set up the system to send immediate notifications to a designated phone number or email address whenever tampering is detected.
- **Mobile Monitoring:** A dedicated Android app allows you to view tampering notifications and check the status of all your protected weighing scales.
- **System Status Tracking:** The guard can track its own operational status, so you always know if the anti-tampering system is running or not.
